- Prototype Services
- Sub Assembly (outsourcing)
- New Product Development
- Special Packaging
- Insert Molding
- Small and Large Runs

A Source You Can Trust for Plastic Injection Molding

Pacor Plastics...Improving Your Bottom Line

Unique Combination of Services, Equipment, Experience, and People Provides An Ideal Approach To Meeting Your Plastic Injection Molding Needs

PACOR's plastic injection molding capabilities provide an excellent opportunity for outsourcing many of your current items or subassembly operations to free up your production staff and facilities for more profitable utilization. Specializing in small runs, prototype services, new product development, and insert molding, PACOR handles time consuming projects while you run heavy production in your facilities cost effectively.

We have a press capacity up to 550 tons to handle your requirements. Also, we have the expertise and resources to process PVC and most engineering resins.

At PACOR, our commitment to excellence begins with our people: **Experienced, Quality-Driven, Dedicated,** and **Professional.** By combining the expertise of our people, quality materials, experience, and state-of-the-art equipment in a *Lean Manufacturing* environment, we meet your requirements cost effectively and deliver your products to specification and on time.
